

Elnvite

PRODUCT AUDIT

Product Audit & Growth Proposal

UX · Conversion · Performance · SEO

Prepared for the Elnvite Team · **June 2026**

Harsh Prajapati
Fullstack Developer

Project Overview

02

OBJECTIVE

Conduct an independent audit of Elvite's public website to identify opportunities for improving user experience, conversion, performance, SEO, and overall product quality.

SCOPE

Pages audited across the public website:

Homepage

Templates

Pricing

Articles

FAQ

Contact

About

Live Demo

Signup

DELIVERABLES

- ✓ Comprehensive Product Audit
- ✓ Pricing Page Redesign (Implemented)
- ✓ Articles Page Redesign (Implemented)
- ✓ Performance & Lighthouse Analysis
- ✓ Technical Recommendations
- ✓ Live Frontend Demonstration

Audit Scope & Methodology

03

SCOPE

Website Pages

- ✓ Homepage
- ✓ Templates
- ✓ Pricing
- ✓ Articles
- ✓ FAQ
- ✓ About
- ✓ Contact

Additional Flows

- ✓ Live Demo Flow
- ✓ Signup Flow

METHODOLOGY

UX Review

Page-by-page usability evaluation

Conversion Review

CTA placement and user journey analysis

Technical Review

HTML inspection · Metadata · Link verification

Performance Review

Google PageSpeed · Core Web Vitals

Content QA

Article quality · Duplicate detection · Consistency

PROCESS

Audit

Review all public pages

Technical fix roadmap

Key Findings

The audit identified issues across conversion, content quality, technical SEO, and performance that directly impact user experience and business outcomes.

1 Conversion Experience

✓ PROTOTYPE

PROBLEMS IDENTIFIED

- Two conflicting pricing structures
- Incomplete pricing copy reduced clarity
- Unnecessary comparison before purchase

BUSINESS IMPACT

- Reduced conversion confidence
- Increased decision fatigue
- Lower trust during purchase

2 Content & Information Architecture

✓ PROTOTYPE

PROBLEMS IDENTIFIED

- Duplicate articles
- Broken article filenames
- Inconsistent numbering
- Poor content organization

BUSINESS IMPACT

- Poor discoverability
- Reduced content quality
- Weaker SEO foundation

3 Technical SEO

PROBLEMS IDENTIFIED

- Same page title across major pages
- Duplicate meta descriptions
- URL quality issues

BUSINESS IMPACT

- Lower search visibility
- Poor indexing
- Generic search results

4 Performance & Accessibility

PROBLEMS IDENTIFIED

- Mobile Performance Score: 68
- Largest Contentful Paint: 41.0s
- Large network payload (~21 MB)
- Missing accessibility basics

BUSINESS IMPACT

- Slow mobile experience
- Lower Core Web Vitals
- Accessibility barriers
- Higher abandonment on slow networks

These findings formed the basis for the redesigns and technical recommendations presented in the following slides.

Case Study 1 — Pricing Page Redesign

05

Improving purchase clarity and reducing decision friction.

CURRENT

- ✗ Two pricing structures
- ✗ Incomplete sentence in copy
- ✗ Conflicting feature lists
- ✗ Weak comparison experience

BUSINESS IMPACT

A confusing pricing page pushes visitors into extra comparison work before they trust the purchase — every added step lowers conversion confidence.

MY SOLUTION

- ✓ Single pricing structure
- ✓ Cleaner information hierarchy
- ✓ Dedicated comparison table
- ✓ Enterprise CTA
- ✓ Improved plan selection flow

EXPECTED IMPROVEMENTS Faster plan comparison · Reduced cognitive load · Clear upgrade path · Better purchase confidence

[LIVE PROTOTYPE](#)
einvite-pricing-625378471000
.asia-southeast1.run.app

Implemented, not theoretical. This redesign is live and interactive — not a static mockup.

Case Study 2 — Articles Page Redesign

06

Improving content discoverability and information architecture.

CURRENT

- ✗ No search
- ✗ No categories
- ✗ Duplicate articles
- ✗ Endless scrolling
- ✗ Poor content hierarchy

BUSINESS IMPACT

A large, unfiltered article list makes existing content hard to find — visitors give up before discovering what's actually relevant to them, which lowers engagement.

YOUR SOLUTION

- ✓ Search functionality
- ✓ Category filters
- ✓ Featured article
- ✓ Improved article cards
- ✓ Better information hierarchy
- ✓ Load More pagination

EXPECTED IMPROVEMENTS Easier article discovery · Better content organization · Improved user engagement · Stronger SEO foundation · Scalable content architecture

[LIVE PROTOTYPE](#)
elnvite-articles-resources-
625378471000.asia-southeast1.run.app

Implemented, not theoretical. This redesign is live and interactive — organizing existing content, not creating new content.

Technical Recommendations

07

High-impact improvements identified through technical audit and PageSpeed analysis.

PERFORMANCE FINDINGS

METRIC	NOW	TARGET
Mobile Performance	68	Target 90+
Desktop Performance	98	Maintain
Largest Contentful Paint	41.0 s	Reduce below 2.5 s
Network Payload	21 MB	Reduce with optimized media

Values from Google PageSpeed Insights, mobile report.

PRIORITY IMPROVEMENTS

Media Optimization

- Defer hero video loading with a poster-image fallback
- Load video only after user interaction
- Convert large images to WebP/AVIF
- Lazy-load non-critical media

Accessibility

- Add lang="en" to the HTML document
- Add accessible labels to icon-only buttons
- Ensure proper labels for form fields

SEO

- Unique page titles and meta descriptions
- Replace uncrawable JavaScript links
- Improve Open Graph and social preview images

Frontend Performance

- Defer non-critical CSS
- Reduce render-blocking resources
- Audit third-party scripts
- Optimize the DOM structure

These recommendations require access to the production repository and were therefore documented rather than implemented.

Roadmap & Next Steps

08

Recommended implementation roadmap based on the audit findings.

PHASE 1

Immediate Priorities

HIGHEST BUSINESS IMPACT

- Deploy redesigned Pricing page
- Deploy redesigned Articles page
- Fix duplicate metadata
- Resolve pricing page copy issues

PHASE 2

Technical Improvements

PERFORMANCE & ACCESSIBILITY

- Optimize hero videos
- Convert images to WebP/AVIF
- Implement lazy loading
- Add accessibility improvements (lang, labels)
- Remove render-blocking resources

PHASE 3

SEO & Product Quality

SEARCH VISIBILITY & STRUCTURE

- Unique metadata for all pages
- Add missing HTTP security headers
- Audit third-party scripts
- Open Graph images
- Fix uncrawlable links
- Clean article URLs

ALREADY DELIVERED

✓ Product Audit

✓ Performance Analysis

✓ Pricing Redesign

✓ Technical Recommendations

✓ Articles Redesign

✓ Working Prototypes

The redesigned pages demonstrate how these recommendations can be implemented while maintaining Elnvite's existing brand identity.

Scoped by impact, not by guesswork. Each phase builds on what the audit already proved matters most.

END OF PRESENTATION

Harsh Prajapati
Fullstack Developer

This audit was conducted independently using only publicly available resources, browser inspection, and performance analysis. The redesigns and recommendations demonstrate how targeted improvements can enhance Elnvite's user experience and technical quality without changing its core product vision.

Thank You

Thank you for your time.
